📍 Cairo

SUMMARY

software testing engineer with a bachelor's degree in computer science and Engineering who is ready to help the team achieve company goals. Seeking to work in a well-established growing organization that would enhance and develop my skills, expose me to the different market conditions, and where my academic background can be applied.

PROJECTS

Automation testing using Selenium & TestNG

📅 06/2023 - 08/2023

In this project, I learned how to:
- Use Page Object Model (POM) design patterns and principles.
- Use Data-Driven Testing for Parameterization.
- Use Assert and verify in appropriate scenarios.

Manual testing live project – guru99

📅 10/2022 - 11/2022

In this project, I learned how to:
- Review SRS document.
- Create test cases for a Banking application.
- Execute test cases and report bugs for practice.
- Overcome common issues that occur in a project.
- Execute Exploratory testing.

API testing using Postman -Trello

📅 12/2022 - 01/2023

In this project, I learned how to:
- Create API tests & write scripts
- Test status codes.
- Test API parameters.
- Test API authentication.
- Test error handling .
- Test API response data.

PERSONAL SKILLS

Effective communication and negotiation skills

Organised and prioritise my own workload effectively

Good listener and learner, able to communicate well with a group and on an individual level.

Interpersonal, collaboration, and problem solving skills
